

LB Medium (Lennox), Powder

Cat. No. 48501

Product description:

General LB Medium after the recipe of Lennox is a standard medium for growth and propagation of *E. coli*. The salt content is suitable for plasmid production, but enables as well the addition of magnesium chloride by phage amplifications. Ideal for cultures, which need salt-sensitive antibiotica e.g. Zeocin.

Composition	Component	Concentration
	Tryptone	10 g/l
	Yeast extract	5 g/l
	NaCl	5 g/l

Storage Recommended storage temperature of powder is +15 °C – +30 °C. Keep container tightly closed, because powder is very hygroscopic.

Solution procedure:

To prepare 1 l medium:

1. Fill 900 ml water dest. in an 1-liter flask. Suspend 20 g powder medium while stirring.
2. Adjust to pH 7 with ca. 0.2 ml 5 N NaOH with stirring, fill up to a final volume of 1 liter.
3. Then autoclave medium for 20 min. at 121 °C.
