CERTIFICATE OF ANALYSIS

Hyaluronidase from ovine testes	**Cat.No. :**	**25118**
lyophil. EC 3.2.1.35	**Contr.No.:**	**151501**

Parameter	Method	Specification	Result
Molecular weight		ca. 55 000	
Appearance		white lyophilisate	corresponds
Solubility	1 mg/ml 0.02 M Phosphate buffer pH 6.9 cont. 0.45 % NaCl and 0.01 % BSA	clear and colorless	corresponds
Activity (U/mg)	Hyaluronidase	min. 1 000	1 158
Minimum shelf life			11.12.2017
Storage (°C)			-15 to -25

Unit definition

1 Unit is that amount of enzymatic activity which produces the same reduction in turbidity in a mixture of hyaluronic acid and albumin as one I.U. (International Unit) of a standard hyaluronidase preparation. 1 I-unit = 1 USP-unit = 1 NF-unit.

The product was prepared from ovine testes of New Zealand origin, collected from healthy animals intended for human consumption, and slaughtered in abattoirs under veterinary control.

The raw material was frozen at below minus 15°C immediately after slaughter and kept at this temperature until the time of manufacture.

Furthermore, the preparation was exposed to a pH of less than 4.0 for greater than 24 hours during the purification, and all reasonable precautions were taken to prevent contamination of the product during and after processing.
